THE NEW COMMUNISM is exciting! Hundreds of pages, decades of research, a method and approach to understanding and confronting reality, and a strategy to actually make a revolution in the 21st century. This is monumental; for the billions of people who catch the worst hell under this system, and for everyone wondering why the world is the way it is and how it could be radically different, Bob Avakian's work is unrivaled! To get to a new and radically better society on the path to a world free of exploitation and oppression will take nothing short of a Revolution, not an easy task however you slice it. But, in BA's work and leadership, readers and revolutionaries can discover the scientific method and approach that has been lacking in previous socialist movements, as well as an understanding of **how** revolutions are made, and ways to move forward **today** to fight the power and transform the people. Viva BA!

What People From Around The World Are Saying About THE NEW COMMUNISM

Why is the world the way it is? Is there a way to change it? Isn't communism a nightmare? What is socialism? What kind of world could we build?

From questions of morality to questions of what is reality, from the science and its role in changing the world. The more crucial questions for human emancipation are not just explored but deeply developed in this book in a very profound way. Have you ever felt in the Matrix as Neo when he took the red pill? Have you ever felt the veil of illusions, ignorance and lies fed to you by this system get dissipated? Revealing, challenging, bold, and very accessible. That is what this book is about, Bob Avakian challenges the ways you think about yourself, and the world, it exposes what ways of thinking represent what interests, it challenges you to take action in the road to emancipate the whole world, not just a group of people, an area or a country, but all of it. And it gives you a way to do so. This is the science, the strategy and the leadership humanity needs for bringing into being a whole new world. It all is in here and is a challenge from beginning to end.

The world has been crying out for *The New Communism*!

The conditions of the masses of the world are intolerable, they have been awakening to political life and yearning for revolution.

It has been decades since the loss of the last socialist states and we would not be able to have a deep understanding of the reasons that led to the defeat of socialism by the defenders of the old order had it not been for the tireless investigation of BA that has led to the development of *The New Communism*.

The New Communism is what revolutionaries across the world have been needing to be able to break with the traditional ways of thinking of what true communism and a true revolutionary line based on a higher scientific (over)

(continued) understanding is, to be able to lead masses of people to emancipation. As Mao said: "The correctness and incorrectness of the ideological and political line decides everything" and this is what has been lacking in the revolutionary communist movement.

The New Communism, the correctness of the ideological and political line, along with other factors could have put the 1979 Revolution in Iran on a different path; it could have had taken the struggle in Peru to a different level and put Nepal on the map as the next socialist state.

The New Communism is the true meaning of internationalism, it is communism with a true global perspective, The Whole World Comes First, the angle from which communist revolutions need to be led within local boundaries.

The New Communism is as important to today's world as Marx, Lenin and Mao's work was to previous revolutionary struggles.

It needs to be taken broadly out to the masses of the world. Without *The New Communism*, there will not be a radically different socialist economic system; a radically different political system, the dictatorship of the proletariat; and a transition to communism, and the masses of people will suffer endlessly.

A full page ad for *THE NEW COMMUNISM* will be appearing this month in the *Publishers Weekly* which will be distributed at the Frankfurt, Germany Book Fair—the largest book fair in the world.

Dear Revolution: I am really excited about the publishing of the latest major work by Bob Avakian, "The science, the strategy, the leadership for an actual revolution, and a radically new society on the road to real emancipation", in the form of a book, with an apt new title, ***The New Communism***. I believe this to be an historic event at an historic moment, with world wide ramifications for the future of humanity.

At a time when people in this society are standing up against and resisting oppression and taking a firm stand against police brutality, the timing could not be more opportune. Also, there is a great upheaval in the world, and the Imperialists are having to deal with ever sharpening unresolvable contradictions. This has the potential for sudden jolts in the system of capitalism imperialism.

Besides, the suffering in the third world, (including the South Asian subcontinent, the area I migrated from); the death and destruction caused by wars for empire; the human suffering of displaced persons/refugees; the constant degradation of the environment with catastrophic possibilities, are all crying out for communism.

Since the restoration of capitalism in China in 1976, after the death of Mao, the first wave of communist revolutions practically came to an end. In the new era, Bob Avakian, coming out of the upsurge of the 60's, emerged as a new revolutionary leader, who took over the responsibility of deeply analyzing the whole previous revolutionary experience, studying both their short comings and great achievements, with the aim of finding what led to the reversal of communism in China, and how to move forward from there on.

His painstaking work of several decades culminated in "The New Synthesis". As Ardea Skybreak has rightly said in her interview: "... Bob Avakian's work in this period is actually ushering in a new stage of communism". BA's work has taken the science of communism to another level, and in addition to making significant leaps in many aspects of revolutionary theory, and important ruptures, he has also made crucial breakthroughs and resolved crucial contradictions, putting the science of communism on a far more firm foundation. He has raised Internationalism to a new dimension, completely breaking with narrow nationalism, national chauvinism, identity politics and the like. This is reflected throughout his works: "... the whole world comes first", "...American lives are not more important than other peoples lives", "...emancipation of humanity" and so on. Today, in the era of the second wave of communist revolutions, BA's New Synthesis is the only correct revolutionary theory that can lead to a successful revolution. His breakthroughs and path breaking contributions, put him at a par with the founders of communism, Marx and other great communist leaders, Lenin and Mao. ..
